3. Requirement Specification

Scope

- Display the content relevant to the courses
- Lead Generation Form
- Lead Administration

Out of Scope

- Integration with database
- User administration – login, logout, user registration,
- Search Engine Optimization
- Backup site
- Responsive page for administration

Functional Requirements

Following features and pages should be available in the website.

1. Common Content
   a. Header
   b. Footer
   c. Navigation
2. Home Page
3. About Us Page / Profile Page
4. Course Listing Page
   a. Learn Java
   b. Learn Python
   c. Learn .NET
   d. Learn Microsoft Office
5. Course Details Page
   a. Learn Java
   b. Learn Python
6. Course Schedule Page
   a. Learn Java Schedule
   b. Learn Python Shedule
7. Contact Us Page
8. Registration Course Page
   a. Full Name
   b. Email
   c. Contact Number
   d. Select Gender
   e. Select Course
9. Thank You Page
10. Lead Administration Page
    a. Add – to add new lead
    b. List – to list the leads
    c. Edit – to update the lead details
    d. Delete – to delete the leads
11. Sitemap Page
12. Privacy Policy Page

Non-functional Requirements

   a. Client (User) – Windows 10 and above. Mac 10.11 and above
   b. Server (Hosting Environment) – Windows Server

5. Task 2

Task Statement:

User Interface and Information flow

Solution:

This section is documented in the Project Presentation.

6. Task 3

Task Statement:

Developed HTML pages with screen capture.

Solution:

The HTML pages are documented in the Project Presentation.

7. Task 4

Task Statement:

UI Components developed using jQuery with screen captures.

Solution:

These components are documented in the Project Presentation.

8. Task 5

Task Statement:

Summary of effectiveness of Lead Generation form based on 2 metrics.

Solution:

The website is made simply, so that customers are not confused when visiting the website
The home page is designed as a landing page with an image, button and an attractive message or offer toencourage website visitors to take action by clicking on it.

Metrics for Lead Generation Form

Lead generation forms are made as simple and attractive as possible to make customers able to fill out forms easily, Unobtrusive colors will make customers more comfortable when opening the website.

Making a simple form will make it easier for customers to fill out, no need to fill in long answers, just short answers.

9. Task 6

Task Statement:

Modifications to User Interface based on effectiveness

Solution:

This is discussed in the Project Presentation.
